MIMS 2.1.212c - Fibonacci Pressure Fibonacci Cycles

When does “reversal” happen?

January 2022

Re: What happens if “fibonacci pressure” meets another Fibonacci?

From the Desk of Sf. Ramon Careaga, founder EPEMC, www.epemcgateway.com

Dear Readers,

Chart for BTF 20 D 1h printed on 1/24/22, 5:13 PM

Figure 1 - BTF following the OLD fibonacci, and once dipping below new fan, surging up to old fan line. Credit: author/Thinkorswim

EPEMC :: Data Science :: Crypto :: Finance
Membranous Interface of Material and Spiritual

Figure 2 (above) - On 1/24 a new Fibonacci cycle was confirmed with bottom; the following day 1/25 the curve was reacting as predicted. Would this continue after the crossing on the 27th at 7am? (prediction)

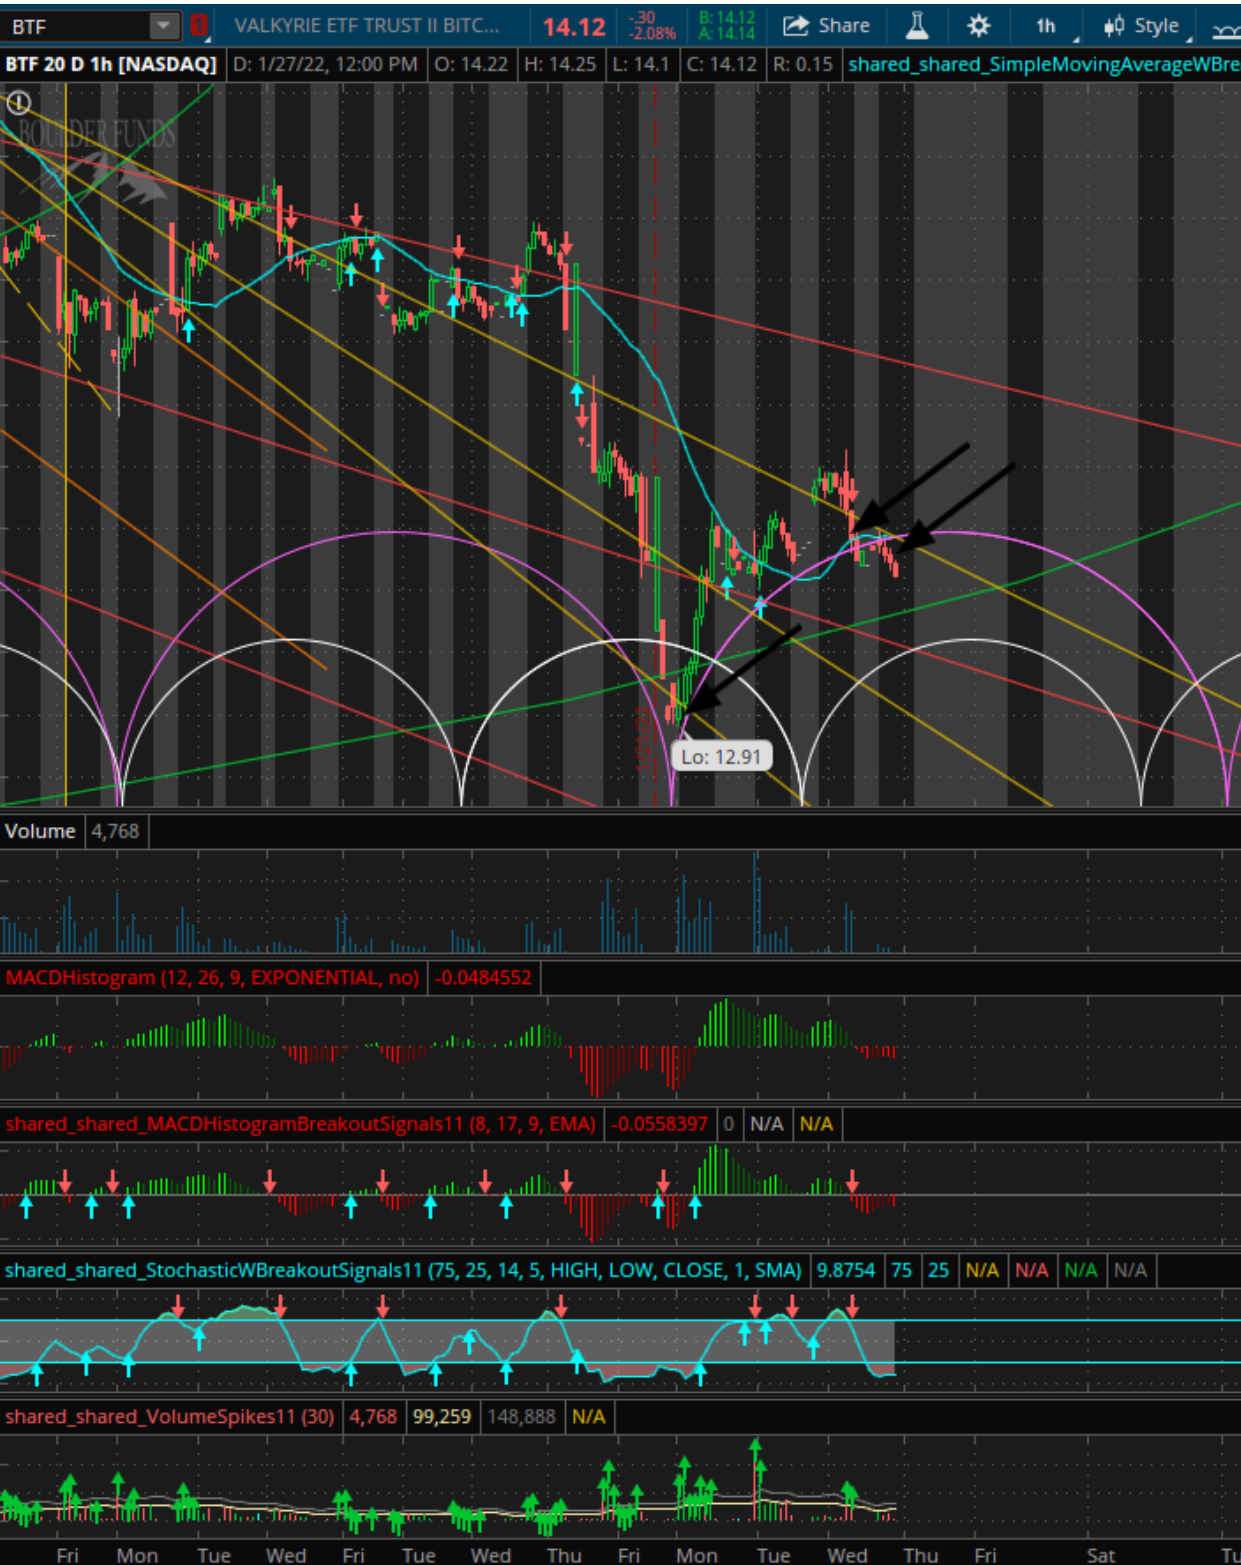

Figure 3 -
 BTF at 12
 pm 1/27; the
 futures price
 fell, as
 expected
 due to
 dropping
 volume and
 low market
 sentiments,
 and did so
 between
 1/26 6pm
 and 1/27
 4am; Fan
 pressure
 pushes
 back.
 Next spiral
 encounter
 (with fan):
 1/28 6am;
 the author
 predicts a
 stalling fall,
 but
 continued
 downward
 pressure out
 til at least
 February.

Sincerely,
 Sf. R.
 Careaga
