

# China vs. the World

## IQ as a Strategic Asset; a graphical comparison

Sf. Ramon Careaga, BSEE, MSTOM

August 2021

Best Viewed at: <https://bit.ly/3iZmQGr>

### ABSTRACT

Intelligence Quotient is a reliable measure of problem and puzzle solving ability and rational skill sets. It has a strong correlation to the ability to control emotion and avoid violent conflict. But in terms of National Security, it is an asset in particular to engineering of solutions to societal problems, and other STEM issues and development. In other words, it is a practical measure of future growth, vis-a-vis population use, growth, and of pragmatic concerns of infrastructural development. Thinking on this issue, a nation's future is tied not only to capitalistic growth based on population, but more pointedly to the available IQ asset "at the ready" for that development. In this paper, the author demonstrates the predictable difficulties the US and allies such as Europe and India will have in competing directly (individually) with China in a global marketplace of ideas, products, development, and STEM. Looking at the comparisons, it is clear that the problem is worsened as IQ rarity is increased. Therefore, high IQ individuals in the allies will be a rare asset relative to their Chinese counterparts. The resultant of this investigation is that new solutions to leveraging this rarer IQ must be provided in order to offset the strategic disadvantage (anti-Shi 勢, deemed Que 缺). The author will attempt to provide a few simple examples, using martial arts concepts and Art of War principles. However, a unique project should be provided for engineering in more non-martial and non-business means.

*Keywords: IQ - national security - China - United States - European Union - India - Russia*

# Introduction

Intelligence is not merely about gathering information: it is about application of that knowledge. Specifically we mean problem-solving, although a further IQ we could term “Wisdom Quotient”<sup>1</sup> might be an even more important measure when comparing ancient cultures (like China or India) to newer cultures (like the United States). Problem-solving is a nascent or innate need for STEM fields<sup>2</sup> and it is the primary concern of IQ testing, which relies on logical puzzles to determine a score. Most IQ systems are based upon a 200 max score scale, which is what we are concerned with here.

China’s average IQ is 105, while the US, Europe, and India are all lower (98, 100, and 82 respectively). This could and should be considered a strategic disadvantage (que), in the same way that a short man is disadvantaged in basketball, or a thin man in weight lifting, or an obese man in swimming. There is nothing odd about this kind of discussion, whatever feelings it elicits. In a purely rational discourse, we are simply comparing relative abilities to problem solve and engineer solutions. In an era of increased cyber attacks, this is a matter of national security and state sovereignty.<sup>3</sup>

However, based upon the illegal (often wanton) actions of China in covering up the COVID “gain-of-function” research<sup>4</sup>, lab leak<sup>5</sup>, and deadliness of SARS-Cov-2<sup>6</sup>, the world is awakening to a larger concern. Just as the world was slow to wake up to Hitler’s National Socialist party, it seems slow to realize that China’s ‘beneficence’ (such as the now-known spy network<sup>7</sup> of Confucius Institutes<sup>8</sup>, or the “Road and Belt Initiative”<sup>9</sup>) is actually colonialism<sup>10</sup> and imperialism<sup>11</sup> masked under the guise of economic trade<sup>12</sup>. According to Dr. Pillsbury<sup>13</sup> and retired Air Force General Robert Spalding<sup>14</sup> (both favored insiders of the CCP at one time), the view of the CCP about America’s post World War II boom is warped not to view the Marshall Plan<sup>15</sup> as a form of altruism, but the acts of the new Ba 霸 hegemon.

In point of fact, the CCP has considered freedom and democracy as direct threats to its own “100 year marathon” plans to dominate the world, replacing first the USSR, then the United States and NATO. Therefore it literally declared an official war upon the Declaration of Independence, and the Bill of Rights<sup>16</sup>. Since Xi Jinping’s rise to dominance, and the flushing of millions of Communist Party opposition members<sup>17</sup>, he has crushed Hong Kong’s freedoms<sup>18</sup>, ending its status as the #2 freest state on Earth<sup>19</sup>, and has made frightening speeches, such as the following at the 100 year anniversary of the CCP celebration:

<sup>1</sup> [https://mbassous.wordpress.com/category/wisdom-quotient/#:~:text=Wisdom%20Quotient%20\(WQ\)%20is%20the.and%20manage%20the%20implications%20positively.](https://mbassous.wordpress.com/category/wisdom-quotient/#:~:text=Wisdom%20Quotient%20(WQ)%20is%20the.and%20manage%20the%20implications%20positively.)

<sup>19</sup> <https://www.heritage.org/index/ranking>

*“The Chinese people will never allow foreign forces to bully, oppress or enslave us. Whoever nurses delusions of doing that will crack their heads and spill blood on the Great Wall of steel built from the flesh and blood of 1.4 billion Chinese people.”<sup>20</sup>*

The irony of this speech is, of course as despots are wont to do, a complete fabrication and coverup for internal atrocities<sup>21</sup>, tyranny, and megalomania. As socialists<sup>22</sup> typically do, he is foisting upon others what he himself is doing<sup>23</sup> and engaging in “The Big Lie”<sup>24</sup>. It is a similar problem as per Black Lives Matter (corporation)<sup>25</sup> <sup>26</sup>, antifa (terrorist organization<sup>27</sup>), and the Sunrise Movement<sup>28</sup> and Democratic Socialists of America<sup>29</sup> (organizations behind these, and funded by George Soros). They stage false flags and leave bricks and other weaponry in place<sup>30</sup>, and then blame the opposition<sup>31</sup>. The media then covers through a form of gaslighting and video and audio manipulation<sup>32</sup>, knowing they will never be forced to retract or pay for all lies and mistakes (nor in time), though they repeatedly lose lawsuits<sup>33</sup>. There is a strong suspicion of direct and indirect funding<sup>34</sup> of these movements from the CCP, who employs a literal “50 cent army”<sup>35</sup> to help shape western opinions on the internet<sup>36</sup>, and uses other forms of asymmetric warfare<sup>37</sup> in order to engage in “Unrestricted”<sup>38</sup> (or Total<sup>39</sup>) war with the United States and NATO allies, and to dominate colonial targets in

<sup>23</sup> <https://www.northeastshooters.com/xen/threads/why-do-socialists-always-blame-someone-else.3480/>

<sup>24</sup> There is an infamous case of lying among American socialists, on purpose on TV. However, the search results are not candid. The author did find this example, in a rare case of journalism from CNN (pre 2020):

<https://www.cnn.com/2019/11/09/europe/berlin-wall-30-years-schools-grm-intl/index.html>

<sup>25</sup> <https://blacklivesmatter.com/about/>

<sup>26</sup> <https://www.dailysignal.com/2020/07/07/these-18-corporations-gave-money-to-black-lives-matter-group/>

<sup>29</sup> <https://www.youtube.com/watch?v=S7v3G3kdTYM>

<sup>30</sup> <https://www.youtube.com/watch?v=zFYnbLtySus>

<sup>31</sup> They come so primed to fight, that the “Proud Boys” organization was able to set them up against themselves, and “pull the chair out” by not showing up. Antifa took to attacking itself. The Proud Boys are notoriously primed for violence, themselves, but their label as a White Supremacist organization is far overstated: their leader at the time of the Nov. 6 riots was a Mexican-American. They could, under some broad views, be considered also a terrorist organization, but they themselves have never set out as antifa or BLM to burn buildings or terrorize local civilians. Other, far more extreme nationalistic and far or alt-right organizations have, however. Unfortunately far left organizations like the Southern Poverty Law Center dilute the discussion by aggregating patriotic organizations and all militias, with such hate organizations! This is incredibly problematic since American Patriotism and American Nationalism are often at odds with one another. A subject for another paper.

<sup>32</sup> <https://www.projectveritas.com/news/video-james-okeefe-breaks-down-big-win-against-the-new-york-times-in-veritas/>

<sup>33</sup> Aside from the Nick Sandmann incident, outlets such as the Washing Post, Huffington Post, and even the New York Times have repeatedly lied - outright - and caused a lot of damage to persons’ reputations. Later they pay for it, but the narrative is firmly planted (as propaganda) in the minds of their constituency.

<sup>34</sup>

<sup>38</sup> <https://www.oodaloop.com/documents/unrestricted.pdf>

<sup>39</sup> <https://www.cc.gatech.edu/~tpilsch/INTA4803TP/Articles/Total%20War-definition&discussion.pdf>

Africa<sup>40 41</sup>, Australia<sup>42 43</sup>, Oceania<sup>44</sup>, India<sup>45</sup>, Eastern Europe<sup>46 47 48</sup>, South America<sup>49</sup>, Cuba<sup>50</sup>, Italy<sup>51 52</sup> and Sri Lanka<sup>53</sup>. Southeast Asia appears to be a region of particular thorniness to the CCP, and in its paranoia has been building fake islands<sup>54 55</sup> and then claiming them as real islands belonging to China since ancient times<sup>56</sup>. They also build out commercial ships into warships<sup>57</sup>, and enter into neighbor's territorial waters (such as the Philippines<sup>58</sup>).

All of this seems at first (and probably still does to the Chinese people themselves, who are generally patriotic and nationalistic<sup>59</sup>), as defense mechanisms against United States' "aggression."<sup>60</sup> But actually since General MacArthur, the United States has been reluctant to flex its power in the region and has maintained only ambivalent interest in keeping a Pacific buffer zone<sup>61</sup>. If anything, the US approached China as an ally since Richard Nixon<sup>62</sup> in order to use the CCP as a hedge against its former best friend, the Soviet Union (who had smartly realized the CCP's long term goals to replace Soviet Communism with its own particularly imperial and Qinshi-huangdi form of it<sup>63</sup>). Chinese Communism is now famously pseudo-capitalistic<sup>64</sup>, but it wasn't set free by the Communist party. It broke free because of the helpfulness of foolish, arrogant bureaucrats of the IMF, World Bank, and Federal Reserve Bank<sup>65</sup>.

Where does this leave the world? When a "tiger grows its wings" (如虎添翼) as the Chinese saying goes, it is difficult to avoid bloodshed and terror. "When two tigers occupy the same mountain, one must be killed."<sup>66</sup> It's a tiger... flying about. In Chinese lore only a dragon can surpass such a fell beast. China has spent years "deceiving the sky"<sup>67</sup> (瞞天過海) and building "phantom cities"<sup>68</sup> in order to fool the world, and lay

<sup>62</sup> <https://www.historytoday.com/history-matters/richard-nixons-opening-china-and-closing-gold-window>

<sup>63</sup> <https://www.history.com/this-day-in-history/rupture-between-ussr-and-china-grows-worse>

<sup>64</sup> The black market and hidden economy, as well as 5 year plans, reduce the form of capitalism, and it does not have any form of a free market. The Chinese people have been capitalistic and innovative, however, far longer than the West.

<sup>65</sup> The lure of vast emerging markets and a population with savings proved too much, even for Cold War wisdom.

<sup>66</sup> 一山不容二虎,

<https://en.wiktionary.org/wiki/%E4%B8%80%E5%B1%B1%E4%B8%8D%E5%AE%B9%E4%BA%8C%E8%99%8E>

<sup>67</sup> See B. Gertz's book. But the idiom means "Mask one's real goals from those in authority who lack vision by not alerting them to one's movements or any part of one's plan." [https://en.wikipedia.org/wiki/Thirty-Six\\_Stratagems](https://en.wikipedia.org/wiki/Thirty-Six_Stratagems)

<sup>68</sup> Literally "Ghost Cities" <https://www.youtube.com/watch?v=le6zd3Rwu4c>

'friendly' traps (反客為主)<sup>69</sup>. Now it is engaging in a mad rush to finish the job with its digital e-yuan<sup>70</sup>, and making deals with the now eager Russian ascendancy, eager to reestablish itself and escape the tight grip of the West's financial throttling of its economy<sup>71 72</sup>. Who can blame Russia?<sup>73</sup> They aren't foolish enough to fall for China's lies, and have been involved in meddling in Chinese and Japanese affairs of the region for over 200 years<sup>74</sup>. Spy roads between the nations are now established ancient pipelines. But now they are also building literal pipelines<sup>75</sup>. China wants, desperately, to be the world's reserve currency<sup>76</sup> and the center of all financial hegemony<sup>77</sup>. It wants (indeed asserts its right) to be the Ba<sup>78</sup>. The author maintains, based on this present analysis, that without following some of the suggestions of China's Art of War (bingfa 兵法) texts: **it will be**. This is, as the Chinese idiom says "as easy as a stone smashing an egg"<sup>79</sup> or "a boulder rolling downhill."

---

<sup>69</sup> Ibid. "Make the host and the guest exchange roles (反客為主, Fǎn kè wéi zhǔ): Usurp leadership in a situation where one is normally subordinate. Infiltrate one's target. Initially, pretend to be a guest to be accepted, but develop from inside and become the owner later."

<sup>70</sup> <https://www.investopedia.com/understanding-chinas-digital-yuan-5090699>

<sup>71</sup> <https://home.treasury.gov/news/press-releases/jy0127>

<sup>72</sup> <https://fas.org/sgp/crs/row/IF10779.pdf>

<sup>73</sup> The author is not a pro-Russia supporter, per se, however, if Germany got two 2nd chances, why hasn't Russia? It is no surprise that they've fallen backwards since 1991's major reforms, into a land of heavy handedness.

<sup>74</sup> <https://www.history.com/this-day-in-history/soviets-declare-war-on-japan-invade-manchuria>

<sup>75</sup> <https://www.newsweek.com/russia-china-gas-pipeline-first-bridge-1475067>

<sup>78</sup> See: Stealth War

<sup>79</sup> Technically 以卵击石 means for one to try to smash a stone with an egg, implying impossibility.

# China vs. The United States, a study in a problem of IQ Que

The concept of shi is that, as its homophone (實 meaning excess) suggests, it is plenty of or at least trying to expand. But in the West we have Que: a shrinking<sup>80</sup>, aging, overweight society<sup>81</sup>, hellbent on genocide of the unborn<sup>82</sup> and a literal anti-fact dumbing down of society. It is “Atlas Shrugged” finally coming to life. It wasn’t a natural emergence, but bought and paid for by very rich capitalist-hegemons<sup>83</sup>. They made their money, but do not believe in the American Dream or even the value of European economic sovereignty<sup>84</sup>. The resulting agenda of Que was most obviously proven when Donald J. Trump won the 45th Presidency as a populist, and set about freeing the American economy, demanding the world pay for itself and applying tariffs, and was being impeached even before he took office<sup>85</sup>. One could note COVID was an extremely coincidental event for the Democrats and other Deep State rivals<sup>86</sup>, coming along as it did to shut down the world’s largest economy<sup>87 88</sup> just as it was breaking China’s<sup>89</sup>.

Nevertheless, actually President Trump was fighting an uphill battle, rather like Sisyphus. It was always likely to end in a failure for which the happy-go-plucky entrepreneur was going to be blamed for policies set up by his opponents over 40 years ago in the Senate. Why? Not because he particularly failed: he achieved by far the most of his promised agenda than any sitting President in living memory.<sup>90</sup> Rather, because the people themselves are easy to fool.

It isn’t in the purview of this paper to cover the costs of criminality, or to divide up the IQ distributions by race or make cases for the economic inequalities (or lack of productivity and drains on society, depending on the sociopolitical point of view) within the US economy and population. The entire population is treated herein as an aggregate. As there are substantial portions of the United States with lower IQs as an average, which also have higher rates of incarceration and unemployment<sup>91</sup>, it can be understood that this adds to the Que, and detracts from the “Innate Shi” of the United States<sup>92</sup>. So the picture is probably bleaker than demonstrated. China by comparison convicts 99% of those charged and in many cases simply eliminates them, in a rather dystopian “Soylent Green” like fashion in some cases<sup>93</sup>.

<sup>80</sup> <https://www.cato.org/blog/census-finds-us-population-will-decline-without-immigration>

<sup>81</sup> <https://clinical.diabetesjournals.org/content/22/1/1>

<sup>82</sup> The industrialized genocide of infants is, infamously, rooted in Eugenics and its key adherents like Planned Parenthood founder Margaret Sanger. Estimates of the numbers of doctors, engineers, lawyers, teachers, nurses, etc. that were aborted under a poorly passed Roe v Wade (Roe is now herself anti abortion) are difficult to note. But if this had not happened, the US population would be nearly double, and the situation presented in this paper not be as dire.

Unfortunately racism is a long standing socialist programme, as it was in Nazi Germany, Zimbabwe, and many other places. Now industrialized abortion (for stem cells) is an unchecked monster ravaging the population and threatening national security. For more on the “fresh fetus parts” industry, see

<https://www.washingtonpost.com/news/wnk/wp/2015/07/17/why-planned-parenthood-wont-stop-donating-fetal-organs/> for an example of the propagadna supporting the industry.

<sup>88</sup> <https://www.cnn.com/2021/04/21/coronavirus-worlds-10-biggest-economies-before-covid-pandemic-vs-now.html>

<sup>89</sup> <https://www.motherjones.com/kevin-drum/2018/05/donald-trump-has-totally-kicked-chinas-ass-on-the-trade-deficit/>

<sup>90</sup> Even at 2 years in he was doing fair <https://www.bbc.com/news/world-us-canada-38663043>, despite the now defunct impeachments, however his third and fourth years were far better with two massive peace plans.

<sup>91</sup> Some of these issues are legitimate ripples from the Civil Rights era (which was itself downstream from Jim Crow), and some are intransigent problems of the IQ and EQ deficiencies of various populations. The author believes they can be helped and positively dealt with, even within the community and not through blatantly racist policies (such as Australia’s and Canada’s infamous ‘reservation schools’). They won’t be dealt with at all via police state policy or isolationism; “sweeping a problem under the rug” has never solved any problem.

<sup>92</sup>

[https://www.academia.edu/49950880/CALCULATING\\_THE\\_INNATE\\_SHI\\_%E5%8B%A2\\_OF\\_COUNTRIES\\_USING\\_THE\\_UNITED\\_STATES\\_OF\\_AMERICA\\_AS\\_A\\_TEMPLATE\\_1](https://www.academia.edu/49950880/CALCULATING_THE_INNATE_SHI_%E5%8B%A2_OF_COUNTRIES_USING_THE_UNITED_STATES_OF_AMERICA_AS_A_TEMPLATE_1)

<sup>93</sup> Forced organ harvesting is not that far off from forced industrial cannibalism.

Figure 2.  
Real Median Household Income by Race and Hispanic Origin: 1967 to 2018

Notes: The data for 2017 and beyond reflect the implementation of an updated processing system. See Appendix D for more information. The data for 2013 and beyond reflect the implementation of the redesigned income questions. See Table A-2 for historical footnotes. The data points are placed at the midpoints of the respective years. Median household income data are not available prior to 1967. For more information on recessions, see Appendix A. For more information on confidentiality protection, sampling error, nonsampling error, and definitions, see <<https://www2.census.gov/programs-surveys/cps/techdocs/cpsmar19.pdf>>.

Source: U.S. Census Bureau, Current Population Survey, 1968 to 2019 Annual Social and Economic Supplements.

Figure 1 - Median Income by Race and Ethnicity; credit: Census Bureau<sup>94</sup>

Nevertheless, the following two figures will lead to some very important foundational discussion about the Que, and the Innate Shi, which will inform the remainder of the discussion. The above figure demonstrates the relative racial income disparities in America, and also fairly accurately the hierarchy of average IQ for each racial group (except Native Americans, which are not pictured for some unknown reason).

The graphs were produced with “millions of people” as a population designation, to provide 4 to 5 significant figures. Also, please note the curve is truncated, but this does not mean there are no people with lower or higher than 3-sigma of IQ. A sigma of 15 was used for the standard deviation of IQ<sup>95</sup>, for all countries regardless of race, nationality, or other factors<sup>96</sup>.

<sup>94</sup> <https://www.census.gov/library/visualizations/2019/demo/p60-266.html> also see:

[https://en.wikipedia.org/wiki/List\\_of\\_ethnic\\_groups\\_in\\_the\\_United\\_States\\_by\\_household\\_income](https://en.wikipedia.org/wiki/List_of_ethnic_groups_in_the_United_States_by_household_income) Note that Indian Americans make substantially more money per household than Chinese Americans, and this might have to do with the pool of immigrants’ relative STEM involvement, entrepreneurship, government programs, time of generational expatriotship, or cultural differences (and choices of profession and region of settlement). In short the issue is divorced from the greater IQ discussion at large.

<sup>95</sup>

[https://www.davidsongifted.org/gifted-blog/iq-and-educational-needs/#:~:text=The%20mean%2C%20or%20average%2C%20IQ,\(IQ%2085%2D115\).](https://www.davidsongifted.org/gifted-blog/iq-and-educational-needs/#:~:text=The%20mean%2C%20or%20average%2C%20IQ,(IQ%2085%2D115).)

<sup>96</sup> For example, roughly half of India’s population of children is exposed to fecal-oral contamination, and this is thought to have serious delitory effects upon the children’s development there.

<https://www.nytimes.com/2014/07/15/world/asia/poor-sanitation-in-india-may-afflict-well-fed-children-with-malnutrition.html>

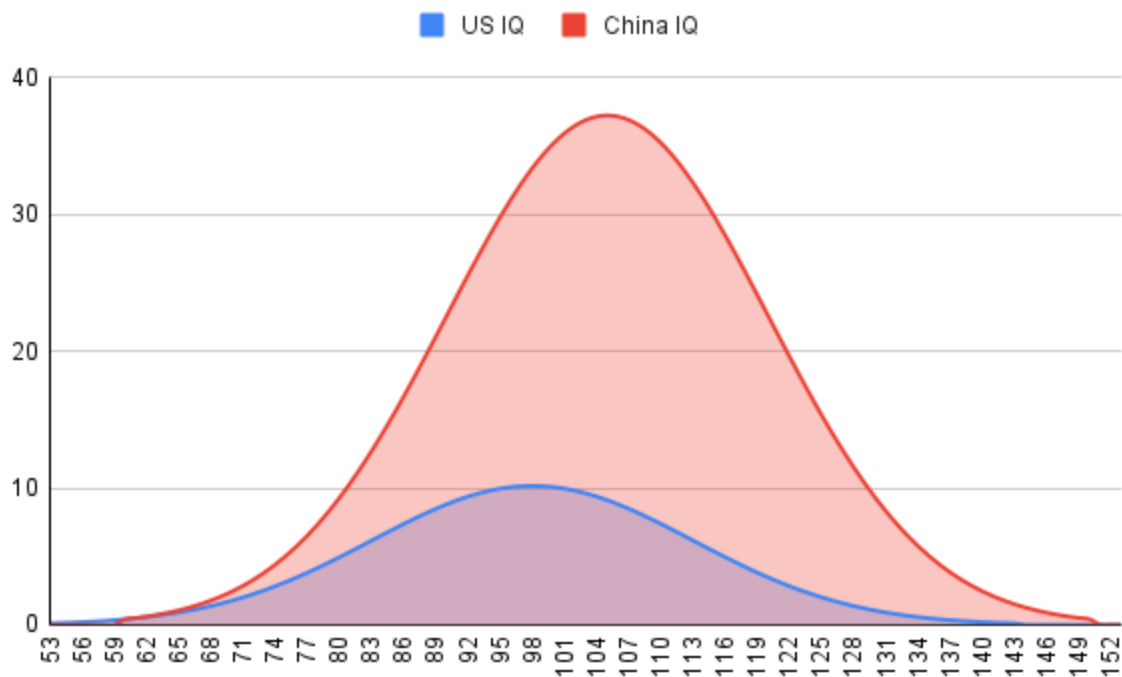

Figure 2 - China vs USA IQ distribution curves (millions vs IQ/200)

### % more population China/US by IQ

Figure 3 - Visualizing the issue in terms of how many more people in China there are at each IQ level

The two graphs are shocking and yet unambiguous. In Figure 2 we learn that there are 3.3 Chinese people for every average American. This gets worse when we start to consider real intelligence (120+) when there are 6.5 Chinese people for every American with an IQ of 120. When you get to discussion of genius the problem will exceed 15x, 20x, even 30x. Another way to think about the average issue is that while an average worker in the USA has to choose to be a truck driver, nurse, or school teacher, in China they can have each one and then a little left over. So in the field of STEM, if the average IQ is around 120 and this is represented by a civil engineer, in China they can produce 3 other engineers, plus a lawyer, doctor, captain in the military,

and half a dentist. When we speak of surgeons, rocket scientists, professors, or other very high IQ positions over 130 or 140, then the problem accelerates as per Figure 3.

## China vs. Europe

Europe is a bit more complicated because it is a conglomeration. Not all EU members are NATO allies. Some are within the “iron curtain”. Some former USSR states are practically NATO allies. Many have extraordinarily low IQs because of lack of STEM access or a history of being war torn (see Figure 4).

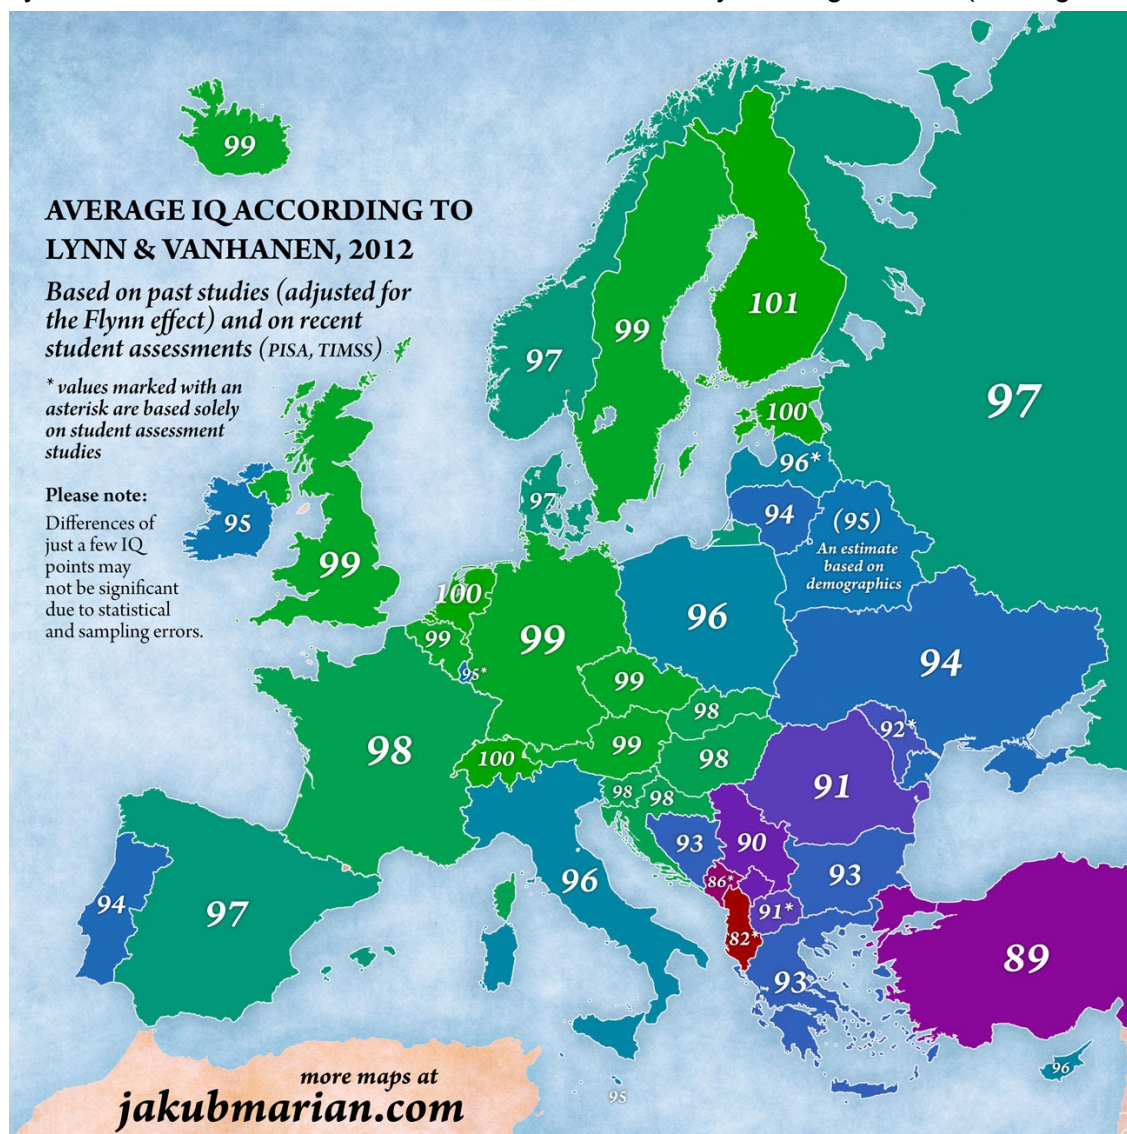

Figure 4 - Average IQ in Europe; credit: jakubmarian.com<sup>97</sup>

Nevertheless this is a crude study at any rate, under the vein of the “innate shi” or “innate que” (counterspace of China’s innate shi minus that of other nations). So some large margin of error is to be expected.

<sup>97</sup> “Low average IQ of a country is indicative of low quality of education, not low “innate intelligence” of the population. IQ is measured relative to the whole population, in such a way that the average should be equal to 100 (which is why IQ tests regularly undergo a process of norming). However, since the quality of education has been improving steadily in most countries, a person scoring 100 on a modern standard IQ test would have scored around 120 on an IQ test from 1950 (this is called the [Flynn effect](https://jakubmarian.com/average-iq-in-europe-by-country-map/)). <https://jakubmarian.com/average-iq-in-europe-by-country-map/>

Figure 5 - China vs European Union IQ (again millions vs IQ/200)

#### % more population China/EU by IQ

Figure 6 - China vs. Europe; same story but less severe

Figure 5 looks so similar to Figure 2 that it is easy to imagine there's not a major difference. But here we reach one of the first hurdles to US retaining its 'hegemony' socioeconomic-geopolitical (SEGP): while Europe has an increased population and higher IQ average of 100... it is so hopelessly entrenched in differing ideologies, cultures, and historical allegiances, that an imperial China seems as solid as a boulder by comparison. Yet, in the later sections, when the author proposes solutions, there will be critiques to China's ascendancy as well.

## China vs. Russia

Figure 7 - China vs. Russia IQ

### % more population China/Russia by IQ

Figure 8 - the steepest curve yet

Looking at Russia's curve, they are in the most precarious position of all; which isn't historically unique for them. Caught between the power hungry and greedy Germanic EU and the power obsessed tyranny of the CCP, they have little choice but to be aggressive in the domains not controlled by the NATO powers absolutely: such as cyberspace and energy. The key to Russia's survival will be to play two sides off one another, and await their opportunity.<sup>98</sup>

<sup>98</sup> 借刀殺人 "to kill with a borrowed knife" and combined with 以逸待勞 "Wait at leisure while the enemy labors"

## China vs. India

While Brazil is both smaller and weaker in average IQ<sup>99</sup>, India seems a natural competitor to China. Unfortunately, it is still a 2nd World country just like Brazil. If it can continue to develop itself, in 30 or 40 years it could develop. Strategically it is absolutely invaluable as an encirclement partner. Historically, it is a difficult land to conquer, and very high in WQ. Militarily, however, they have been not necessarily the best American

ally in the region<sup>100</sup>, owing to their displeasure with The US' strategic alliance with Pakistan. However, President Trump began speaking with India about expanding infrastructure. It wasn't so hard with the CCP's maneuvering against India via Sri Lanka<sup>101, 102</sup>.

Figure 9 - India vs China IQ

### % more population China/India by IQ

Figure 10 - The worst curve yet, when it comes to high IQ assets of China vs. India population.

<sup>99</sup> 87, with a population of 213.9 M

<sup>100</sup> [https://www.fairobserver.com/region/north\\_america/relations-between-america-and-india/](https://www.fairobserver.com/region/north_america/relations-between-america-and-india/)

<sup>101</sup>

<http://www.japantimes.co.jp/opinion/2010/06/29/commentary/world-commentary/china-and-india-competing-over-sri-lanka/>

<sup>102</sup> <https://www.express.co.uk/news/world/1452166/india-news-china-navy-indian-ocean-conflict-sri-lanka-port-ww3-vn>

Bear in mind, the problem for India is not potential, but weakness of infrastructure. China had the power of the greatest empire in human history - post war United States - to increase it for almost 50 years, almost like an intravenous injection. They were taught finance, legal sophistication, and tons of western science and technology was acquired through theft<sup>103</sup> and forced IP transference<sup>104</sup>, in order to access the vast markets and growth offered<sup>105</sup>. It was an unholy sacrifice, based on the specious and maybe foolish supposition that capitalism and democracy being “naturally superior”<sup>106</sup> would convince the CCP to abandon its tyrannical ways and embrace freedom and totally free markets. This is now proving very false, indeed. Instead, China has accelerated kicking out westerners and even taken to openly admitting to the plan.<sup>107</sup>

## China vs. the World

To give the World a chance, Brazil is included while Africa, Mexico, Canada, and Australia are ignored (for simplicity). IQ's are averaged while populations are aggregated. However, bear in mind half of Europe and Russia itself would be suspect allies. They may join a new Axis involving Italy, North Korea, China, and Iran. It is difficult to predict in the new Cold War 2/ WW3.0 environment<sup>108</sup>, with the new domains of war: space and cyberspace involved in the mix (as well as lawfare). It can be assumed that despite the equally advanced intelligence and spy network of the former KGB as to its US counterparts, that a relatively similar level of infiltration and even more corruption in Russian government by CCP agents is underway. Nevertheless, we would be curious to note how the IQ asset comparison would be in a dichotomous environment. For comparison we shall also have individual overlays (except Brazil).

Figure 11 - China vs the World Allies (including Brazil), and overlays from previous figures

<sup>103</sup> <https://law.stanford.edu/2018/04/10/intellectual-property-china-china-stealing-american-ip/>

<sup>104</sup> <https://www.nationalreview.com/2021/06/china-is-stealing-our-technology-and-intellectual-property-congress-must-stop-it/>

<sup>105</sup> <https://money.cnn.com/2017/08/14/news/economy/trump-china-trade-intellectual-property/index.html>

<sup>106</sup> It turns out this false supposition comes from the leadership of central bankers and other NGOs, as well as the arrogance of the Nixon Administration (according to Dr. Pillsbury who was on the inside of it the entire time). Whereas in reality what gave America its advantages were cultura, strategic, geographical, and a bit of “manifest” destiny.

<sup>107</sup> [https://www.theepochtimes.com/why-the-chinese-regime-wants-to-kick-out-western-journalists-now\\_391019.html](https://www.theepochtimes.com/why-the-chinese-regime-wants-to-kick-out-western-journalists-now_391019.html)

<sup>108</sup> Aka the Digital Cold War fought in space and cyberspace, and with hackers and AI.  
<https://nationalinterest.org/feature/america-vs-russia-china-welcome-cold-war-ii-25382>

It is clear from this graph that both Brazil and India make a massive difference, while the US and EU are nearly the same, and Russia is a somewhat negligible X-factor. However, as is seen in Figure 11, China retains an important edge.

% more population China/World by IQ

Figure 12 - China vs. world, break-even point at around 109 IQ, 1 pt above Hong Kong & Singapore's values<sup>109</sup>

Unfortunately, again at real intelligence, 120 IQ, we see a disparity of 1.76 Chinese people for each of the Allies'. At a genius of 140, that figure balloons to around 5.

The only good news, is if the Allies were involved in a non-nuclear Total War (NNTW) for survival of way of life, that China's population is also now aging and projected to shrink. China has, of course, thought of this, and is beginning programs of a form of genetic colonialism in its "barbarian" regions and neighbors.<sup>110</sup> It started this in Tibet, but has expanded to Mongolian and steppe regions<sup>111</sup>.

Still, while the lessons of Japan's "stagflation"<sup>112</sup>-population axial relationship<sup>113</sup> have not fallen on deaf ears in the West, or in China it would appear, the facts of gravity are that the world population will peak at around 9 billion people<sup>114</sup>, and it is the 3rd and 2nd world where it will continue growing, not in China.

## Mitigation of IQ Asset Que/Disadvantage

The issue of solving the deficiency or disadvantage of IQ assets is not simple. In fact it's almost certainly an insurmountable problem, pragmatically speaking. It isn't that mankind cannot unify and create the Alliance referred to before. It is that the problems of: language, politics, momentum, propensity, jealousy, distrust (including of America), and half a dozen other barriers, are not trivial. It is only made worse by one simple fact: China knows, and fears, this unity, and actively works to sow discord between allies. That's an

<sup>109</sup> Does this indicate one of China's strategic objectives in dominating those populations? How useful will an oppressed people be in supplying the "love of the People" to the hegemon's "Awesomeness" (雄壯)? We have no data to this effect, but the author would be surprised if it was 60% efficient.

<sup>110</sup> 夷 (yi) or hu - traditionally anyone outside of Zhongguo 中国 (China)

<sup>111</sup> [http://www.fao.org/ag/againfo/programmes/en/empres/news\\_060514b.html](http://www.fao.org/ag/againfo/programmes/en/empres/news_060514b.html)

<sup>112</sup> <https://www.harvardmagazine.com/2010/07/an-aftermath-to-avoid>

<sup>113</sup> <https://swarajyamag.com/economy/why-is-japan-stagnant-for-past-30-years-answers-are-in-religion-and-culture>

<sup>114</sup> <https://thenewdaily.com.au/news/2020/07/15/world-population-peak-2064/>

ancient technique, and is a complex form of Zongheng<sup>115</sup> theory coming back from the Warring States to haunt the modern world. The author is a student of the theory, but in terms of statecraft it is completely impractical in modern diplomacy without being aggravating. The old problem of World War I - “entangled alliances”<sup>116</sup> - is a lesson desired to only be learned once. Yet, there is nothing new to this problem in Chinese history. What’s worse is the “war hawks” (鷹派) love to “rattle the sabres” and whip up support for nationalism and war. Soviet style parades of missile and rocket launching vehicles in the capital and around the country are common<sup>117</sup>.

Right, so what solutions would the author offer? Thinking about the problem logically, there is a natural martial limit to what can be done. The continual employment of greater and greater powerful weapons has a practical limit both in cost and issues such as environmental destruction, etc. But the other practical issue comes from encirclement: no one can fight off enemies on all sides. This is a similar type issue to having 3, 4, even 12 or more Chinese people with your same IQ for every one of you. The only way to deal with such a situation is *leverage*. The only practical leverages in this world are: weaponry, technology, and money.<sup>118</sup>

Before engineering or imagining new solutions, or creative theories, we should then explore these three.<sup>119</sup>

1. Weaponry: the United States, Russia, and Europe have been pushing the development edge of weaponry since the end of World War II. Primarily the United States has led the way. And in almost no time, by comparison, China has managed to hack into military contractors and steal almost all of the most important battleships<sup>120</sup> and aircraft<sup>121</sup>, modify them, and put them into use. This is a practical application of the ancient Chinese classics, particularly one story about the collection of wisdom<sup>122</sup>. While the West complains, Russia flows with it and gets involved in digital warfare. At first this did not have a dampening effect on innovation in the West. But now it is becoming difficult both to compete (in practical sales and in terms of matching new weaponry). And also there is a loss of ardour for innovation, when it is known that your projects will be stolen for a fraction of the cost of hiring a large army of hackers.
2. Technology: again the innovation of the West (and Japan and South Korea) is legendary. Capitalism, democracy (or Republics), and free markets have set free mankind’s innovation. However, there is a practical cost. Hence: intellectual property rights, an extension of the liberal concept of “property rights”, a form of individual “God-given” rights<sup>123</sup>. While China has plenty of property rights, they also have a long history of nationalization, often at a whim, and of frank, open theft of IP. It isn’t called theft, because the corporations are forced to “share” their IP and development. This, among other reasons, is why Google abandoned its efforts to be a supporting framework for China<sup>124</sup>. After doing some work, it became clear that the CCP wanted

---

<sup>115</sup> 縱橫家 Horizontal-Vertical School aka “The School of Diplomacy”; “According to the Han Feizi, a contemporary work on Legalist Philosophy, supporters of “Vertical Alliance” encourage the weak multitude to attack the one strong side whilst the Horizontal Alliance promote the one strong side attacking the weak multitude. They are all fickle and capricious, change sides frequently and are unable to decide who their master is. Both Su Qin of the Vertical Alliance clique and Zhang Yi of the Horizontal Alliance clique issue many plans and schemes that are politically subjective.”

[https://en.wikipedia.org/wiki/School\\_of\\_Diplomacy](https://en.wikipedia.org/wiki/School_of_Diplomacy)

<sup>116</sup> [http://www.bellviewcoc.com/sermons-PDF/entangled\\_alliances.pdf](http://www.bellviewcoc.com/sermons-PDF/entangled_alliances.pdf)

<sup>117</sup> <https://www.globalsecurity.org/military/world/china/parades.htm>

<sup>118</sup> In the old days religion and superstition provided a leverage over kings and nobility. But that eventually ended as the ages of the gods more and more departed, and people stopped believing they would be destroyed for violating Heaven’s Will (天意)

<sup>119</sup> Without studying and examining the Innate Shi of China and the others (only USA), there’s only so much that can be said. Much will seem a bit speculative.

<sup>120</sup> <https://www.popularmechanics.com/military/a746/3319656/>

<sup>121</sup> Including the \$1.5 trillion F-35

<https://www.sandboxx.us/blog/chinas-next-carrier-fighter-will-likely-be-based-on-stolen-f-35-plans/>

<sup>122</sup> <https://www.gutenberg.org/files/15250/15250-h/15250-h.htm>

<sup>123</sup> See: the writings of John Locke, and of St. Thomas Aquinas.

<sup>124</sup> <https://www.technologyreview.com/2018/12/19/138307/how-google-took-on-china-and-lost/>

to replicate Google, modify it, and not allow them to make a real free profit in China. Also, while technology is always useful in its own domain, technology can also lead to poor sociological or environmental results. Profits may mislead thinkers and consumers into imagining something is a good, useful, or safe product. Pretty soon the technocracy is in love with a destructive technology. So that may be an important warning or note for the Allies, if they wish to use technology as leverage. Not only can it be stolen, but one can be misled this way, or that, in trying to chase the dragon.

3. Money: finance has been one of America's most powerful weapons or tools for the last 100 years. However, China has replicated the 100 years of financial sector development in only 8 years<sup>125</sup>, and now has four of the 5 largest banks in the world.<sup>126</sup> Moreover, while there is (of course) corruption in Europe, America, and Russia, China has an overt tendency towards black market financial services sector. Infamously, their companies have 3 sets of accounting books.<sup>127</sup> This kind of flexibility, as well as their advantage of continuous inflation to avoid default of mortgages<sup>128</sup>, and internal policy reward for all GDP, even fake GDP<sup>129</sup>, gives China a distinct financial advantage in fiat expansion. However, at this time, very few countries trust China's currency, not even its own allies<sup>130</sup>, who still buy US bonds and trade primarily in dollars, for stability.<sup>131</sup>

Considering these effectors and stimulators on the shi, how should the Allies, particularly the United States of America, implement its IQ assets in order to avoid 'encirclement' and being outperformed by China in a strategic battle of NNTW? The following are the areas the author feels should be primarily bolstered:

- ☐ Infrastructure
  - ☐ Replacements
  - ☐ Hardening
  - ☐ Duplications and backups
- ☐ Techno-reservations
  - ☐ Chip manufacturing
  - ☐ Energy stations and reservoirs
  - ☐ More hardening
  - ☐ Underground infrastructure and manufacturing
  - ☐ Subterranean mining at the deepest levels (with robots)
- ☐ Group IQ Redundancy
  - ☐ Think Tanks
  - ☐ Masterminds
  - ☐ Multi-board service
  - ☐ Virtual Executives and other Gig economy innovations
- ☐ Power-contracting<sup>132</sup>
  - ☐ Programmers

---

<sup>125</sup> <https://carnegieendowment.org/chinafinancialmarkets/68128>

<sup>126</sup> <https://www.investopedia.com/articles/investing/082015/4-biggest-chinese-banks.asp>

<sup>127</sup> <https://foreignpolicy.com/2009/09/03/how-china-cooks-its-books/>

<sup>128</sup> <https://gbr.pepperdine.edu/2010/08/will-china-float-the-yuan/>

<sup>129</sup>

<https://www.bloomberg.com/news/articles/2018-02-01/china-s-2015-gdp-puffed-up-by-fake-economic-data-analysis-shows>

<sup>130</sup> <https://fee.org/articles/why-chinas-yuan-is-unlikely-to-challenge-the-dollar-anytime-soon/>

<sup>131</sup> <https://www.afr.com/policy/foreign-affairs/we-cannot-rebuild-trust-with-china-20210715-p589xy>

<sup>132</sup> Because China, and many other places, do not recognize international and US law and global ethical advance, this will probably need to be tied to digital crypto reward... a "proof of work" sort of mentality

- ☐ Engineers
- ☐ Systems Designers
- ☐ Project Managers, etc.
- ☐ Analysts
- ☐ Data Scientists
- ☐ Strong, powerful advancement in AI driven Operations Research<sup>133</sup>
- ☐ Complete and total reform of primary education to be driven towards STEM and History
  - ☐ All specialisms should become intern programs in High School that lead towards technical schools, or PPSE
- ☐ AI Quantum (AIQS) supremacy<sup>134</sup>
- ☐ Technical education programs for bingfa and zongheng specialties, particularly “Total War” etc.<sup>135</sup>
- ☐ Keep checking back as the author is likely to think of more

While one man, with a mere IQ of 133.7 is unable to perfectly cognize solutions to this issue... if the United States and allies could at least consider this proposal and begin here, the author has no doubt a big dent could be made.

## Difficulties Facing the Allies and World

In order to discuss this, it is important to stop believing the lies of the globalist position, that we “are all in this together.” That may be true from one point of view, but it is clearly a useless view in the face of practical realities, especially dealing with China, Jihadism, socialists and anarchists, and the Corporate Technocracy (an oligarchy of billionaires).<sup>136</sup>

Once the reader is past the nonsense one can speak frankly about the difficulties and what it will take to overcome these.

The most difficult to overcome adversities to gathering IQ assets are, in no particular order, but what the author purports is a likely hierarchy (needs testing):

- Divisions or anti-cohesiveness
- Political dissipation<sup>137</sup>
- Ubiquitous Racial Discrimination (URD)<sup>138</sup>
- The Military Industrial Complex itself, particularly its inertia and foibles (re: contract bias and corruption)
- Cultural Egotism
- Language barriers - although less as English is pretty much the world standard
- Financial bubbles<sup>139</sup>

<sup>133</sup> Aka Analytics, technically Op.Res. is a science and analytics uses math in that science. It’s been around for a long time

<sup>134</sup> See the “Asymmetric Vulnerabilities” paper by the author, pp. 18-21

<sup>135</sup> This is to raise public awareness and stop relying upon police and honesty and “rule of law” in an era obviously less about following the law than about the Narrative and Optics.

[https://link.springer.com/chapter/10.1007/978-3-030-19681-3\\_10](https://link.springer.com/chapter/10.1007/978-3-030-19681-3_10)

<sup>136</sup> The paternalism in each of these groups is only made worse with the rise of groupthink heavy maternalism, which is making generations of weak minded, pacifistic simpletons. Maternalism fails its tests at the margins of chaos, in places where ISIS rules, or fascism, or where African migrants are gangraping English women (for example).

<sup>137</sup> Some countries are literally ruled by 5 or 6 parties; India is such a country.

<sup>138</sup> Wokeness is the newest brand of racism, but there’s nothing new about regressive Leftism. It gets rebranded, but the biological wiring is the same, whatever the word-salad is. Nevertheless it is a military demoralizer

<https://www.youtube.com/watch?v=vTRSom1Ssgs>

<sup>139</sup> Double Layer Economics (DLE) could do a lot to mitigate this, see the author’s new paper\*

- Poor cosmology choices (which drain finances)<sup>140</sup>
- Education inadequacy, slippage<sup>141</sup>, and substandard evolution of systems<sup>142</sup>
- Medical inferiority<sup>143</sup>
- Rivalry and bickering among allies, particularly around costs and jurisdiction
- Lawfare<sup>144</sup>
- STEM inferiority created by design inefficiency of design<sup>145</sup>
- Arrogance over present STEM superiority
- Ignorance over STEM ignorance - “you don’t know what you don’t know.”
- Vice Excess, Virtue Deficiency<sup>146</sup>
- Government and banking corruption
- Nonlinear dynamics, “black swan events”<sup>147</sup>, and contagion<sup>148</sup> in general.
- Chaos or what the author terms “jiggle”

In overcoming these items, there should be whole engineering and design teams, engaged by the governments, specially under the purpose of overcoming the Que. The main problem is: there’s no impetus and almost no likelihood of achieving this.

## Critique of the False Awesomeness of China

One of the reasons China is so keen to accelerate their plans (and so lose the patience they long had established in this coup), is the paranoia that “things are not always what they seem.” In the classic Sun Tzu Art of War, when this seems possible, you double the marching speed to try to take the enemy unawares. Unfortunately, the pandemic has created a growing awareness of China’s agenda<sup>149</sup>, and like any thief in the night exposed by sudden brightness, the CCP is panicking. Also, President Trump made them feel completely uneasy and in the jaws of the alpha male lion. The result was a reversion to some of the worst habits, policies, and a draconian crackdown on Hong Kong.<sup>150</sup> This was a very bad move, because Hong Kong was one of the best economies in the world.<sup>151</sup> Another problem has been they need to out-engineer social media’s ability to spread memes and narratives which are not state approved. The world has then had a joyous bit of mirth watching a President make it illegal to compare him to Winnie the Pooh<sup>152</sup>, and increased the internet’s delight in doing exactly that.<sup>153</sup> This undermines the will of the CCP and its citizens, and creates a general sense that

<sup>140</sup> China is all in for PEMC, consequently their fusion reactors are winning the race, currently. At this rate they will create the world’s first Thunderbolt generator (BPT or VG). Again see “Birkeland Polyphase Superweb” pp. 28-29

<sup>141</sup> Such as the United States’ since introducing “free education” in the 1930s.

<sup>142</sup> Sticking to the RRR form of education in a modern, media-driven era.

<sup>143</sup> Too much to write here.

<sup>144</sup> This disadvantage is so lopsided it is not even funny. “Assym. Vuln.” pp. 26-30

<sup>145</sup> <https://www.youtube.com/watch?v=L1kbrIZRDvU>

<sup>146</sup> Roughly paraphrasing the Shu Jing and relying on our knowledge of Rome’s downfall: “all empires fall due to the failure of the virtue of the People alone.”

<sup>147</sup> <https://corporatefinanceinstitute.com/resources/knowledge/finance/black-swan-event/>

<sup>148</sup> <https://www.investopedia.com/terms/c/contagion.asp>

<sup>149</sup> And in no small way, brave men like General Spalding going against the grain and going on outlets like Valuetainment to spread the word.

<sup>150</sup>

<https://www.forbes.com/sites/georgecalhoun/2020/07/19/the-hong-kong-crackdown-is-a-financial-disaster-for-china-is-it-time-to-fire-the-ceo/>

<sup>151</sup>

<https://www.breitbart.com/national-security/2020/05/22/hong-kong-economy-one-of-the-few-to-survive-pandemic-collapse-s-over-chinese-takeover/>

<sup>152</sup> <https://alphanewsmn.com/pooh-china-ban/>

<sup>153</sup> <https://bitterwinter.org/xi-jinping-and-winnie-the-pooh-the-story-that-doesnt-go-away/>

the CCP is the “wizard of oz” or worse: “the emperor with no clothes.” In such a case, the Chinese people *themselves* might ask, “do we even need the Chinese Communist Party?” So while the previously quoted speech seems like rattling the sabre towards the West, it is more likely a not-so-thinly-veiled threat towards the Taiwanese republicans, and other democracy adherents within China’s mainland itself, as well as to the Muslims that might band behind Uighars and other steppe peoples to rebel against the colonialism.

Furthermore, while a large percentage of China is highly nationalistic and patriotic, and even believes the USA is a bully to China<sup>154</sup>, many of the most high IQ individuals in the STEM world know differently. They see what happens to scientists from the Wuhan labs<sup>155</sup>, or journalists<sup>156 157</sup>, capitalists<sup>158</sup> etc. and they frequently defect or have dissident reactions. The CCP policy of welding people in their homes<sup>159</sup> or chasing them with drones<sup>160</sup> during COVID is a diametric contrast to life inside Hong Kong or the West.

Speaking of Hong Kong, as it was crushed and forced into an uneasy integration, those citizens will spread out into the mainland and take their explications of how different liberalized western living is versus coming up in a land where your family farms were stolen, fake buildings and superdams forcibly constructed to prop up GDP<sup>161</sup>, corruption protected while complaints punished, and finally how economic freedom and free markets really work.

Regardless of the foibles of consumerism and modern capitalism, people will not prefer poverty, tyranny and oppression, or the lack of opportunity. They will grow steadily more restless. The more the CCP tightens its grip and drains its own people (after the World pushes back), the more the Chinese People will begin to lose their ardour<sup>162</sup>.

In the United States, 9/11 united everyone into patriotic fervor<sup>163</sup>. But as the 2003 Iraq war became more and more obviously a sham, people split back again and the country is more divided than it was since 1865.<sup>164</sup> However, it can and will obviously swing back to unity under a united threat, such as China. China knows this, and they fear the lion’s teeth all the same. While the tiger beats the lion<sup>165</sup>, the lion damages the tiger also mortally and the tiger walks with a limp. When speaking of nuclear fangs, this is not a limp but missing legs and eyes. China knows this.<sup>166</sup>

Also, there is a key problem for China, geographically, which has always made them leery: they are landlocked from the west, and more than half the country is not currently arable.<sup>167</sup> They can, of course, terraform and reform these regions struck by the cataclysms, but that’s costly, and they are already at 300%+ debt to GDP ratio<sup>168</sup>, and living on borrowed time regarding payments, debts, derivatives, etc. Already the

buildings begin to literally fall over<sup>169</sup>, though they are mere years old. The veneer wears thin and frail. The tiger begins to look like a paper tiger. Instead of a “tiger claw” we are seeing a “cat’s paw”.<sup>170</sup>

Figure 13 - Jet Li tells it like it is in “Fearless”

Finally, while China’s IQ advantage is *probably* insurmountable, it already began to weaken itself - nature takes its course. The smartest and wisest genes leave China and strike out to Africa, Europe, Oceania, and America of course, and will take their know-how with them, and become less and less available to the will of the CCP and their leverage. This is good for the world and for Chinese people. But it leaves China already becoming overweight, and aging, and hollowed out - so to speak - to return back to a worker force society. They want to rapidly enter a services society, but it is not the habit of the people themselves. Right now the habit is to wait on the CCP to fix anything wrong<sup>171</sup>. There is a Chinese story, about Huangdi<sup>172</sup>, which lays out the issue thoroughly: in the end, it was Huangdi’s desire to micro-manage Tian-xia<sup>173</sup> that led to his illness. It was his egolessness that led to all under Heaven becoming his and flourishing.<sup>174</sup> This is a PEMC concept as well.<sup>175</sup>

There is also one unavoidable fact about the paper tiger of China: it has never been a world superpower and gone to war outside itself in the last 500 years<sup>176</sup>. Its military can run games and they can steal all of the US Military manuals it wants, and analyze the data of US war battles, but take it from the author who is a Chinese martial artist and western pugilist... all plans go out the window once you’ve been punched in the face by an actual fighter.

China has too much to lose to fight that way, and now too much to lose to fight in all other ways, unless it sticks to the asymmetric battle plan. No matter if you control the world for a bit, or people’s wills for a while, you cannot be a literal hegemon without the blood and guts of symmetric warfare. There are no instances the author can think of, of permanent victory without it. When and if China decides to play that hand, the real might of the Allies will come out, which is hidden in dusty battle plans, boxes, and secret storage facilities in the Rockies. Therefore, the Allies have **time** to develop their IQ, WQ, and hopefully EQ; to reduce the Que, and balance things out in the favor of democracy, free markets of ideas, etc.

Like “stolen valor”<sup>177</sup> the only thing more wretched and pathetic than martial cowardice, is fake Awesomeness. No matter what, a bully is never considered awesome, and cannot win the “Love of the People.” If America has lost this recently, that’s nature’s course. But it can be found again in patriotic fervor when the American immune system sheds itself of the socialist (Germano-Russian) pathogenic strain of thought which saps the will, and makes the mind lazy and cowardly. However, until that happens, the alliance may be hindered, and it is advisable to not underestimate the danger of an adversary like China.

<sup>175</sup> Pushing electrons to make electricity is not the pattern we see in the cosmos!

<sup>176</sup> Saving perhaps Tibet, if one can call a coup like that a war. They essentially pushed over old men and children who had no defenses at all. It cannot be said to be a military victory.

<sup>177</sup> <http://www.stolenvalor.com/>

## Conclusion

The Innate Shi of China is strongly bolstered by the advantage of IQ assets. However, the World has developments it can do to offset this. Even if China is aware of this advantage, or intuitively cognizant, the fact is that not all art of war factors lie in China's favor. It will, therefore, probably continue along its present course, and extend WW3.0 in order to utilize this advantage, and avoid real conflict. However, this advantage will begin to dissipate over 30 years of time, as well. However, as a cautionary tale, so will (and rapidly) the US and EU's advantages.

Therefore rapid development of key allies in Brazil and India is encouraged, as well as fixing the problems with totally subverted allies such as Australia, Italy, Russia, Mexico, Canada, etc. Without this, the free market conditions necessary for the next level of human expansion and development will be delayed, including any possibility of the Double Layer Economics (to save Globalism and promote sovereign peace and independence.). The US Congress and EU members are encouraged to immediately seek to implement the ideas contained, and "bide for time" to make oneself stronger (or strong again). Patience, and withdrawal, are the most complete pathways forward, at this time. The path of developing "in the dark" is advised, as opposed to the current US policy of frightening the world with terrible power and announcing ever newer technologies and abilities.
