MESS_r 0002 - Welcome Neo²: A Quick Personal Narrative on Observations for Consideration.

J.D. Kines

with Sf. R. Careaga, BSEE, MSTOM

February 2023

Best Viewed at: <https://bit.ly/3YxoFyc>

ABSTRACT

This is a personal narration by the author of different observations made concerning various aspects of the realm of existence and the importance of seeing through the veil of illusions cast upon the world. This paper represents a sequential trail of breadcrumbs that when combined and understood provide a simple pathway for further understanding. True freedom is the ability to express thoughts and ideas unencumbered and unfettered by the vulgarity of fear.

Key Words: Secret Societies - Quantum Gravity Research - SAFIRE Project - SOFT-Net Theory

¹ [MESS0047: the Jewels from Reality Mining... Investigation of MIMS Matrices of Reality with a Realonic Philosoph...](#)

² Figure 1 ([gif](#)) - "No one can be told what the Matrix is, they have to see it for themselves." ; credit: WB/"The Matrix"

Disclaimer

Please allow me to begin with a small quick disclaimer; the understandings presented here are based solely on the observations and experience accumulated over the years of my own personal life. I highly encourage everyone to please read, look, listen, and observe for themselves... I may provide many of the links to different videos and reference points I bring up but ultimately please cross-reference each one. Look up the definition of certain words when needed. Compare, and contrast. Reach for your own understanding. Strive to see the world in the way God intended and not through the eyes of others. Invariably; "Be the change YOU want to see."

It gets complicated quickly and can possibly be overwhelming in terms of the amount of information needed to be processed. All I ask is please, don't allow an emotional response to one or two items along the way or the manner in which I choose to phrase something to be the reason you throw out everything being said. I'm just a fool for a messenger.

Report

With that "All due respect" disclaimer being said let's begin this narrative with Walter Veith. This man has been lecturing for years on the different factions and groups that control the current planetary narrative along with the ebb and tide of information being provided to the general public. He has a great series called Total Onslaught³ available on the Amazing Discoveries YouTube channel that, though I don't personally agree with every single aspect of his findings, there is a depth of truth and importance in his words. Jesuits, Freemasons, Knights of Malta, Skull and Bones, the Vatican; he covers all the finer points of each group and demonstrates clearly the manipulation taking place behind the historical narrative and how it's been provided to the general public only within certain boundaries set forth by these so-called "controllers". Many of these organizations have infiltrated the highest levels of government and corporate hierarchy. To say they are unable to exert influence on the legislative process within each country or even dictate the type of government available to the people is naivety at best and willful ignorance at worst. No matter whether it be through political, economic, or religious methods "controllers" are present, of that there simply is no doubt and they each have an agenda(s).

Accepting this harsh reality we can then move to something a little more fun and uplifting: Quantum Gravity Research out of California. In 2021 QGR put out several great videos discussing Time and the overall reality of the world we live in today.⁴ These individuals appear to be a collection of very smart individuals working hard to understand some very complicated concepts and present them to the public in an informative and educational way. One of the main points expressed by this group is simply that *Reality is made of Information*.⁵ Physicists have argued this point for years, but with little evidence to the contrary and not to the level of understanding provided by QGR. Physicists can go back and forth all day on Energy vs. Information⁶. Everyone can semantically label observances in nature for eternity.

³ [YouTube: Jesus Christ | Just Another Man or Son of God?](#)

⁴ [YouTube: What Is Reality? \[Official Film\]](#)

⁵ [Quantum Entanglement and Information](#)

⁶ [The basis of the universe may not be energy or matter but information - Big Think](#)

We can all argue over the units needed to be used, the exact position to start the observation, or even the angle of declination once observed. Almost any change in variables opens the door for a new semantic label of the observance. This is what the arrogant “controllers” mean when they say, “*We own the science*,”⁷ they own the units of measurement used when observing and therefore maintain the ability to alter or semantically label any findings that do not agree with their ‘controlling’ agendas. It’s truly that simple.

QGR went further to explain E8 Theory⁸ and quasicrystals⁹ along with the overall mathematical and geometrical construct of our existence. The group does a great job of explaining the concept of vector projection¹⁰ and indirectly how ‘dimensions’ are projected into reality from higher mathematical planes of existence. It is some amazing math. Fang Fang is my personal favorite person working there with the QGR group. Her lectures are simply astounding.¹¹ I highly encourage all to watch her lectures and videos and pull from them your own understanding.

Additionally, Robert Edward Grant (though not associated with QGR that I’m aware of) has also done great work in providing further explanations of the mathematical and geometrical world. From the Mona Lisa to the construct of water(H₂O) and the hexagonal snowflake formation Grant¹² covers multiple topics and provides a great level of insight into the sacred geometry that propels our world forward.¹³

Continuing on...From current day Fang Fang and Robert Edward Grant we go back in time just a little to Professor Viktor Schauberger and the understanding he provided on the nature of water.¹⁴

“The majority believes that everything hard to comprehend must be very profound. This is incorrect. What is hard to understand is what is immature, unclear and often false. The highest wisdom is simple and passes through the brain directly into the heart.”

“The human is a being created according to Nature's laws and is therefore dependent upon them. In the course of time our magnum opus, our self-created pseudo-culture, has become a meaningless and incoherent monstrosity. Through the immense power of technology it has reached such gargantuan proportions that it almost equals the power of Nature herself. At the very least it is already able to interfere destructively with her great life-giving functions.”

— Viktor Schauberger

It is very difficult to argue those insightful observations provided by *The Water Wizard* as he was sometimes referred to. Please take some time and read more about this man and his work! Compare what all he learned and provided to the world. It’s amazing how much of this world one man came to understand through the simple study of something so neglected in our time as H₂O. One’s focus in this life is obviously an important thing not to be taken for granted.

¹³ [I highly suggest everyone check all these out and please, I can’t emphasize this enough to cross-reference their works with others in the same field or those who have come before them and make your own determinations.]

¹⁴ [Viktor Schauberger - Comprehend and Copy Nature \(Documentary of 2008\)](#)

I would be extremely negligent when talking about water and studies conducted on its constitution if I didn't mention Masaru Emoto¹⁵. His work on the memory of water¹⁶ is nothing short of revolutionary and an expression of a true artist. He has done amazing work to show how the Aetheric field has a direct effect on the structure of water. Dr. Emoto demonstrated both negative and positive energetic fields and the results of each on water composition. Additionally, he has gone to great lengths to demonstrate the fact that the consciousness of the human mind is very much an energy force as well as any other.

"If you feel lost, disappointed, hesitant, or weak, return to yourself, to who you are, here and now and when you get there, you will discover yourself, like a lotus flower in full bloom, even in a muddy pond, beautiful and strong." "To give your positive or negative attention to something is a way of giving energy."

-Dr. Masaru Emoto

We come now to Dr. Benveniste.¹⁷ This particular gentleman spent years proving the memory of water in relation to antibodies¹⁸. The ability of water to recall the existence of antibodies once introduced, no matter if repeatedly diluted¹⁹. He had some failures in his experiments as any honest scientist would but perhaps his greatest failure was attempting to go against the heavily funded and obviously agenda- driven pharmaceutical industry²⁰. This scientist spent a large portion of his life attempting to help humanity at a fundamental level only to be put through torment and ridicule. Water, almost with no difference to the level of dilution will remember an antibody²¹. This is important in so many ways I am not sure as an observer such as myself how to properly explain it. Please, go see his work for yourself. Try to gain an understanding of the importance of what is being said through his discoveries. Ultimately; he was ridiculed and made to be a joke simply because the 'controllers' deemed it so.²²

All my life I've never understood how so-called "scientists" could be such horrible and mean - spirited people. This is definitely something that needs to change. Everyone needs to start checking their egos at the door before ever donning a white coat. No matter what field or level of expertise. We see the results of greed and ego infiltrating every aspect of science all over the world right now.²³ But that's another topic altogether.²⁴ Go read up on Benveniste.²⁵ He was a pioneer in his field in my opinion and could have helped humanity on multiple levels if not slandered so venomously by his so-called peers.²⁶

We've gotten through Walter Veith and all his presentations on the different "controllers" and we understand E8 Theory a little bit and are almost grasping what quasicrystals are thanks to QGR. And

also starting to understand how the projection of dimensional reality works and thanks to Emoto and Shauger how water holds the memory of this world, so where to next?

SAFIRE Project and Magnesium

The SAFIRE Project²⁷ and the Electric Universe are next in the sequence of understanding.²⁸ These guys clearly demonstrated the importance of plasma and its relationship to our cosmological models and further understanding of the true nature of our world. The SAFIRE engineers were also able to transmute elements out of basically nothing more than energy and a proper mixture of gasses.²⁹ I'm sure many of you are familiar with their work especially if you have followed the Electric Universe community at any level. They have done amazing things in terms of new energy potentials and helping further the understanding of our cosmological existence.³⁰ Yet; the relation to understanding the sun and heavens is not where I wish to travel right now on this particular path. Instead of looking up or looking down, I would like to take a minute and look *inside* instead.

The channel "See the Pattern"³¹ produced a great video on the Transmutation of Biological Elements.³² If one were to compare what is being said and very eloquently explained by Mr. Samuel along with the findings at various points with the SAFIRE Project³³ and finally relate this topic to various studies done on the human body; one would *see the pattern* develop quite rapidly. From Johns Hopkins University to Harvard to the National Institute of Health to Oxford to MIT; it simply does not matter one way or another. Just pull the studies and read them. Take time to learn more about the "Redox" process within the human body³⁴. How nutrients are said to get from one place to another. How hair growth has been explained.³⁵ All of this; from the SAFIRE Project to transmutation may just provide a more clear picture of the process taking place within the pressurized, temperature-controlled human body at almost every level. It is incessantly important to note that Magnesium is one of the more prevalent elemental substances found having been transmuted after the SAFIRE chamber is powered down and measurements were taken. Similarly; divalent Magnesium ions (Mg^{+2})³⁶ are the displaced molecules from the ligand-ion banding process when a "thought" is formed or a memory is recalled. Read the referenced paper on EMF and Neocortical Astrocytes for further understanding but ultimately Magnesium in various ionic states may, very un-technically, be described as the "flatus" of the transmutation process'.³⁷

Plasmoid Unification Model

Recently, G. Hancock, and Randall Carlson were on the Joe Rogan Experience³⁸ where Randall very quickly and cryptically spoke about some mysterious works they were doing out of the Maldives on the Bendall Turbine³⁹ as well as the Plasmoid Unification Model⁴⁰. Randall is a self-admitted Freemason⁴¹ and so into the "controller's" box he unfortunately goes...I don't fault the guy... He can live his life as he chooses but my assertion is that "Secrets" and controlling the flow of information is what got us all into this most damnable spot of confusion⁴² and malfeasances we are faced with today. An individual or society simply cannot build a castle on top of sand. Anything but complete honesty is nothing but a foundation of sand. Secret Societies (SS) have used this technique of slow-rolling information for generations.

Freemasons should have never started all this and NEVER should have allowed the malfeasance to continue as they have for so many decades^{43, 44}. It is only now due to the technological advancements of society combined with the progress made by other 'controlling' groups that they are taking any action whatsoever to rectify the errors of their past.⁴⁵

Setting aside Mr. Carlson's possible Secret Society(SS) membership or not, one very important aspect of the information provided during his JRE appearance was the Plasmoid Unification Model. The individual Malcolm Bendall apparently invented an engine called the Bendall Turbine which 'they' are promoting heavily now through the Strike Foundation⁴⁶ but the interest of this particular paper lies more with the Plasmoid Unification Model and not the Bendall Turbine.

The relationship is clearly exhibited by the PUM and then directly by the SAFIRE results as well as the multiple studies mentioned earlier in this paper on the redox process and then finally culminating with Professor Kurakin's SOFT-NET Theory⁴⁷. The PUM does an outstanding job of providing a combination of all the elements within the criterion of the specific frequencies propagated by each when in direct comparison to the baseline of the energy - dense Hydrogen molecule. The model then 'spirals out' from this hydrogen-based observational center point and provides an ample accounting of all other elemental relationships.⁴⁸

All elements are energetic fields and just different songs sung by the Creator. Transmutation. The SAFIRE guys, namely M. Childs, does a great job in one of his lectures⁴⁹ explaining how when hydrogen is stretched through the introduction of an energetic catalyst it releases a photon. An Energy packet⁵⁰. A little envelope of information to be used however the universe sees fit. The environmentals

present at the moment of creation then enact upon that little photon in one elemental manner or another and eventually matter comes forth. It is the particular 'alignment' within the defined and specific vacuum at the time of transmutation or elementals moving from one energetic state of existence to the next. Alexei Kurakin in his study "*The self-organizing fractal theory as a universal discovery method: the phenomenon of life*"⁵¹ does a phenomenal job of tying all these different aspects of what has been discussed and presented here together into one coherent line of thinking.

How could any of this relate to the Matrix and then by default the Mandela effect?

The Matrix Revealed?

Well, we have these folks at the SAFIRE Project and then we have these folks at Quantum Gravity Research and Robert Edward Grant, etc...all providing great corollary information. All those individuals as well as many other notable names have done amazing work...but we also have what's been referred to as the Coastline Paradox.⁵² The smaller the units used to measure an object will inevitably result in a larger number of those units. Seems as if we are continuously tormented by The Coastline Paradox [Lewis Fry Richardson and expanded upon by Benoit Mandelbrot] in all of the observations made of the earth, the heavens, and even the theoretical understanding of the quantum. Many understand this paradox fully and compensate in their studies or research. Compensate, but not solve. It may all be very simply semantic labeling of projected dimensionality and perpetual motion of energetic states.

Whoever retains the pseudo-authority to provide standardization of the labeling of these observations using the units they so desire (i.e. SI⁵³ vs. The Imperial⁵⁴, the Pascal⁵⁵ Vs. the Pound Per Square Inch(PSI)⁵⁶ therein also are able to determine the validity of such semantic labeling. Confusion is compounded, research is easily opened to interpretation, and important studies are potentially disregarded through this method. Pride, ego, and ignorance are all very dangerous combinations within the human spirit; especially when confounded by greed. The Coastline Paradox provides an easy tool for the "controllers" to control.

Theoretical headaches and confusion, but ultimately this is what the arrogant mean when they claim "We control the Science," what they actually mean is that they control the units of measurement used by all (like the speed of light, the meter, the nanosecond and on and on...)!

Numerology's Masters

Numbers are an important aspect of this control attempted by both esoteric circles as well as the mainstream media and their propaganda campaigns waged against the human population. 37 and 73 are very powerful numbers⁵⁷.

⁵¹ [The self-organizing fractal theory as a universal discovery method: the phenomenon of life | Theoretical Biology and Medical Modelling](#)

⁵⁴ https://en.wiktionary.org/wiki/imperial_system

⁵⁵ [Pascal \(unit\) - Wikipedia](#)

⁵⁶ https://energyeducation.ca/encyclopedia/Pounds_per_square_inch

⁵⁷ [Is 73 the Best Number?](#)

The Bible is stacked full of numerical patterns placed within and utilized by the "controllers" for the sake of promoting their agendas, whatever they may be. The Living Word YouTube channel⁵⁸ does a great job of explaining further and providing all the math. The example referenced is Genesis 1:1.

Please don't simply take my word for this; go and do the math for yourself. Comprehend the importance between the different translations of the Bible provided by the producers of that channel and the information presented. Ask yourself why the "J" is provided in the name of Jesus (whose real name is Yeshua)? The letter was never used by the Hebrews. The number 0 reportedly didn't even make it to the European continent until the late 12th century⁵⁹. But we needed to add a 0 to math, didn't we? Needed to account for certain concepts that were being understood by humanity as a collective. So, inevitably out comes the 0 and along with it the 10th letter of the "English" alphabet. J. 3, 6, and 9 were Tesla's prophetic words: *"If you only knew the magnificence of the 3, 6, and 9, then you would have the key to the universe."* Not 0 or 10. Tesla is another topic; the point here is to properly demonstrate the esoteric numerical game played by the "controllers".

The same hidden esoteric numbering pattern is prevalent in the works of Shakespeare as well. The Bard Code YouTube channel does a great job of presenting this information fully.⁶⁰ This work also supports the mathematical relationship to the pyramids. The numbers 73 and 37 are encoded in multiple structures across the planet.⁶¹

The evidence clearly speaks for itself and very talented and smart individuals have dedicated their lives to understanding much of this information presented here. The highest level of contention is that the 'controllers' have intentionally manipulated the concept of the Christ and the *"Spirit that flows through all things"*⁶² to what can only be seen now for their own organizational benefit, greed, and power-hungry desires.

Ultimately; this will lead to their own demise as we'll surely see sometime in the very near future...but ignorance is a choice. We've all been fed great delusions and swallowed them whole each and every one... hook line, and sinker. No shame. But ignorance is a choice. Research the concept of Gematria⁶³ and then listen to the numerous individuals who are showing clearly how these numerical systems and patterns are being used to control the collective consciousness of humanity. Reverting back to the number 73. Elon Musk not too long ago Tweeted a picture of his "SpaceX" rockets (X is 10 in Roman numerals and also Elon's son's name if I'm not mistaken.)

Figure 2 - SpaceX thruster

⁵⁸ [YouTube](#) Numeric patterns of 37 and 73 in the Bible

⁵⁹ <https://www.history.com/news/who-invented-the-zero>

⁶⁰ [YouTube](#) Pyramid Structure of the Sonnets

⁶¹ <https://youtu.be/UbySP7GcCAY> [SB]

⁶² [MESS0030: PNR - The Breath of God and the 3 Pure Ones](#)

⁶³ [Gematria - Wikipedia](#)

Figure 2 clearly shows Elon's Tweet and the number 73 front and center on the bottom of his rocket. There is an agenda at work here obviously and to assume otherwise and dismiss it as simple coincidence is nothing more than a desire for naivety.

Another recent example: Back to the Future 4 preview recently was released⁶⁴. A clock at 7:30 is placed center screen. In the recent movie Shazam when the hero saves the woman from the mugging victim; \$73 is the exact amount she had in her wallet to give him as a reward. The point I am making is that these are not simple occurrences of coincidence. They are *intentionally* placed within movies and media for esoteric marking or messaging of some kind. I personally do not fully understand the reason or the meanings or the use of the esoteric field in this manner, but everyone should begin paying close attention to the multiple times in movies and news articles and announcements this combination of 37 and or 73 is used.

Take time to look at how many 37s and 73s you see presented. Ultimately, whenever the "controllers" want to manifest something important or hide something equally important from the collective consciousness they use 37 or 73.

The National Carillon in Australia⁶⁵ is another great example of the use of 37 and 73 as these numbers are clearly embedded within the architecture. The "controllers" use those two numbers or a variation almost as much as the Freemasons use the number 33. These numbers all connect to the Golden ratio and the Pythagorean Tetractys as well the harmonic numbers of Pythagorean-Scientific tuning scales. According to Pythagoras, the Tetractys were the symbol of the musical, arithmetic and geometric ratios upon which the universe was built. Pythagoras believed that all numbers were sacred and holy. Ultimately it is further evidence the world is built on language and that language is mathematics and geometry. One could spend an enormous amount of time pointing out all the occasions these numbers and other variations were used in movies, media, architecture, etc... And all could simply be dismissed as artistic expression or simple coincidence. So, let's just stick to Science. The point is to demonstrate the fact they are being used; not to cast judgment or assign intent to every occurrence.

Hydrogen and the Mandela Effect

As hopefully retained from the SAFIRE Project when Hydrogen is stretched: it produces an energetic packet of information. 1 and then a -1 in my opinion depending if you like to think of the process as if it is an accordion. When Hydrogen is stretched or energetically excited by an electromagnetic field it will eventually return to its normal condition after being out of proximity from the energetic field. This results in the -1 ionic antithesis photon being released. Our Sun does this process naturally as it traverses our sky. It is where our O₂ originates daily and what we may also understand as "Time". The constant creation and addition of energetic blank slates or energy packets to be utilized everywhere within this 'closed system' by both the organic and inorganic. Now is where the Mandela Effect⁶⁶ comes into the picture. Take a good hard look at what CERN is doing. Look at how many times they stretch molecules on a massive scale and then simply destroy or "Collide" them⁶⁷.

⁶⁴ [BACK TO THE FUTURE 4 \(2023\) Movie Teaser Trailer | Universal Pictures](#)

⁶⁵ <https://youtu.be/UbySP7GcCAY> [SB]

⁶⁶ [Mandela Effect](https://mandelaeffect.com/) <https://mandelaeffect.com/>

⁶⁷ [Simulation Theory & Secret CERN Experiments](#)

All the "information" or energy packets they are adding to our world but then not allowing for the opposite(-1) to naturally occur. The way they are ignorantly playing with forces they don't truly understand. We supposedly exist in a closed system. So when you inadvertently (or intentionally) add information to a closed system in a synthetic process like what is taking place at CERN or other even other locations as well, the world could possibly get what we all have come to know now as the Mandella Effect. The ME would be a result of the overlapping or an overload of information within the current realm of existence. I could sit here all day and list out the different Mandela Effects people talk about these days but there are multiple good sources for this concept and each one explains it better than I can⁶⁸. I [Jonathan] will present more on this topic in the future but for now, let me simply state for the record: CERN needs to be shut down immediately in my humble opinion. *"Forgive them, for they know not what they do."* -Luke 23:34 or do they?

We've polluted most of our water and food sources. We've damaged our homeostatic mental processes and allowed the same to occur en masse. From the introduction of radio waves to bluetooth, progressively over to now 5G and whatever other forms of EMF. All have likely diluted the human body down to very little in terms of connectivity ability to the aetheric field. We've been manipulated and lied to for decades about the reality of the world we live in, propaganda provided in the place of Truth. It all simply needs to stop.

Figure 3 ([gif](#)) - "No."; Neo stops the coded bullets when he realizes they are mere programs of bullies; credit: WB/"The Matrix"

Conclusions

The worst and most powerful people in the world really only have one trick: fear. They tell you there is a monster out there in whatever form that may be; rival dictators, evil spirits, aliens, viruses, nuclear holocaust, terrorists, and on and on. The controllers know that filling the blank energy packets of information freely floating within the aetheric field with fear-mongering ideas and concepts has a direct effect on cognitive abilities. This knowledge has been weaponized.⁶⁹

Whatever the initial intent may or may not have been, the result is inevitable. No matter the amount of time allowed to pass or the level of distractions offered. The population of this planet has already begun in very meaningful and significant surges to see through these illusions and "tricks" played by the controllers. The organizations themselves that perpetuated many of these silent wars shall (rightfully so) atone for the massive number of transgressions against humanity. As the fear is eroded from the populace more and more each day through the path of understanding and knowing the "power" able to be exerted by these so called 'controllers' will lessen and diminish. Eventually fading to null. Greed and avarice have had their day...it's time for something different.

"I must not fear. Fear is the mind-killer. Fear is the little-death that brings total obliteration." - Frank Herbert
